## INTRODUCTION

# Material & Methods

## Methodology

A survey method. In particular, the quantitative approach is supported by observation and questionnaire

## Instrument

It used a research questionnaire that measures some aspects of teacher quality, and teacher readiness.

## Sampling

The technique of sample collection is proportional random sampling. The samples are 250 teachers from public and private senior secondary school teachers in Bandung district.

## Pilot Study

The pilot study was test for questionnaire and data sample. There were 72 teachers for pilot study and they were different teachers from research sample teachers.

# Result & Discussion
